— SRS Genetics —

We are excited to welcome you to our Annual Female Production Sale. Thank you for considering us as your source of replacement females. We feel we have an outstanding set of females this year that will leave you with a tremendous set of calves next fall.

We would like to emphasize that these are not cull cows; this is a female production sale. We calve out 80 bred heifers every year. With a 99% conception rate on all our females, we must sell 80 cows every year. The cows in this sale represent the top half of the cows sold this year.

These bred heifers are out of the heart of our bred heifer group and Parkes. These heifers are out of our extensive AI and Embryo Transplant program, representing the top 15 proven cows in our herd. In addition, this year we are offering bred heifers that were the top heifer calves, hand-selected out of a progressive herd utilizing top SRS genetics.

The females in this sale are mothers and sisters to herdsires, bulls in the sale, cows in the herd, and even embryo females offered. Skinner cows and bred heifers run in the mountains, exhibiting their hardiness and adaptability.

In order to maintain a uniform elite herd of cows, we sell over 80 cows every year; we have been marketing over 20-25% of our cows like this for over 30 years. SRS cattle are bred for fertility. Over the last four years, of the replacement heifers retained, we have a 98% breed up. These heifers are not fed any concentrates and are wintered on long stem hay. Additionally, these heifers are not forced into cycling using CIDRs, they are synchronized using two shots of Prostaglandin, which means they have to be cycling naturally in order to come into heat.

When it comes down to turning a profit in the cattle business, it is more important than ever to buy high-quality genetics to improve your herd in anticipation of more value and profit in top quality cattle. SRS genetics can and will excel for you in your environment. These females should be problem-free with the stringent criteria we place on udders, feet, and disposition. They will raise big calves, and the cows will come back in bred and work for you for years to come.

Bids

For buyers unable to attend the sale we offer a video of the females for you to view. These will be available two weeks before the sale on our website www.skinnerranch.com. You may call in bids before the sale to Skinner Ranch or Montana Livestock Auction representatives.

Online Bids

You will also be able to watch the sale and bid online for free (with approved application) at cattleusa.com.

Montana Livestock Auction Contacts

Ted Odle - (406) 533-8773 • Blake Nuffer - (406) 533-5904

Settlement on Females

Monies to be collected by Montana Livestock Auction.

Breeding

Angus females will have Angus calves, Salers and Optimizers will have Salers and Optimizer calves.

Female Health

All females are BANGS vaccinated, with Skinner females tested negative for persistent BVD infection. Bred females have been preg-tested by a certified veterinarian. Cows and Heifers have been vaccinated with Pyramid 5, Vibrio-Lepto plus Hardjo Bovis, and Vision 8/Somnus and have been poured.

Cattle Genetics

All heifers and cows are out of Skinners and Parkes herd or are Skinner genetics bred to Skinner and Parke herdsires.

Female Pick-up

Females are available for pick up following the sale at Ramsay. Feed and yardage will be charged on all females until they are picked up at the sale yards.

Delivery

Tanner Jensen is available for assistance. (406) 239-0302
